

Your Sanitary Sewer Crew is requesting your help!

The City of Coon Rapids Sanitary Sewer crew regularly cleans and maintains the sewer system in Coon Rapids. Crews are finding cleaning products in sewer system infrastructure and lift station pumps. Many cleaning products are advertised as “flushable” when, in fact, they are not. Toilet paper should be the only “cleaning product” flushed. Please assist the Sanitary Sewer crew by disposing of cleaning products in the trash and not in the sewer system. If you have further questions, please call Coon Rapids Public Works at 763-755-2880.

As always, if you ever experience a sewer system back up, please call 911.

These are some examples of cleaning products that should not be flushed down the toilet.
